

Lightspeed Systems Management Bundle for Windows vs. Google Solution

Available today at: US: 866.787.0426 • www.hypertecdirect.com
CA: 866.787.0420 • www.hypertecdirect.ca

What makes this Bundle better than Google?

The Lightspeed Systems Management Bundle for Windows was designed to do everything the Google solution does – plus more AND more easily. With Google, you'd need the Management Console and GoGuardian and other solutions (all separate solutions with separate interfaces and separate price tags).

The Benefits of this Bundle:

- It combines everything schools need into a single dashboard rather than separate solutions
- It manages all operating systems (Win, iOS, MacOS, ChromeOS, Android) rather than just ChromeOS
- It offers smart integration with Microsoft's best in class solutions rather than just GAFE
- The best Bundle includes our market-leading Web Filter rather than just simple allow/block filtering

And:

- It is built based on school hierarchies, for a smart balance between delegation and control
- It has simple online testing policies
- It has a Campus Library full of educational content that's easily pushed to students
- The Bundle interface is intuitive and easy, with one-click policies and timed controls

How can we use this Bundle to convert Google users back to Windows?

The Bundle makes it easy to switch with quick on-boarding and a one-click easy button that converts Google docs to O365 docs and puts them in a user's OneDrive.

What if a school is purchasing Windows devices but still some Chromebooks?

No problem, we can manage both from a single interface.

| Feature | Google Solution (GMC+GoGuardian +Hapara) | Management Bundle for Windows |
|---|--|--|
| Account Creation | Google Management Console (GMC) | ✓ |
| Easy Enrollment | GMC | ✓ |
| User and Group management | GMC | ✓ |
